Rafako

Investment summary

Rafako's financial condition deteriorated considerably over 2Q20. We observe a significant hike of the Company's liabilities, including ST ones, suppliers backtracking from credit sales and preferring cash transactions, unfavorable key financial indicators, big operating losses and lack of debt capacity.

Nonetheless the Company's management believes that beside the abovementioned financial concerns there were no direct operating issues implying the risk of business discontinuation. The crucial condition for an assumption of the business continuation is the lack of an intent on the part of the management to discontinue business activities or lack of a decision to declare bankruptcy or put the company in liquidation. So far Rafako has not experienced any staff problems or lost its key management personnel or specialists/ experts or labor force. There is neither visible shortage of raw materials nor risk of serious competition. Neither has Rafako lost its basic markets, licenses or main suppliers though due to the lack of debt capacity the Company's ability to acquire new contracts is severely curbed.

We uphold our ratings. The key issue for the Group is (i) to finish the construction of a 910 MW power unit for supercritical parameters in Jaworzno III, (iii) to maintain financial liquidity through finding new funding sources, (iii) to continue the projects started in line with financial plans, and (iv) to secure an adequate backlog. What is equally important is the implementation of effective restructuring and signing a composition agreement with creditors.

Upcoming events

- 1-3Q20 consolidated financial results release: November 27

Financial forecasts and valuation

2Q20 disastrous performance makes us cut FY20 forecasts again.

The Group's backlog at the end of 2Q20 stood at c. PLN 1.7 billion which implies continuous backlog deterioration as at the end of 2Q19/ 1Q20 its value amounted to PLN 3.145 billion/ PLN 2.324 billion. The Jaworzno III project has the biggest share, namely PLN 0.4 billion. The backlog does not include the Opole contract as PLN 3.2 billion attributable to the parent entity have been subcontracted to the external company (PLN 0.01 billion worth works remain to be delivered).

2Q20 financial results

2Q20 results significantly fell behind our expectations. Sales revenues were under PLN 200 million (-4% yoy and -33% qoq) and 43% below our forecast.

A deep loss at the gross profit on sales level emerged after updating the cost and revenues estimates concerning the 2 biggest contracts.

Revenues

Rafako's 2Q20 sales reached PLN 197.8 million (-8.7% yoy). The deterioration followed lower revenues from the Jaworzno III and Vilnius contracts. Some positive impact on 2Q20 sales came from the enhanced commitment to the construction of two steam units on Indonesian Lombok Island.

Costs

Rafako's 2Q20 cost of sales reached PLN 410 million. Given the revenues and cost of sales the Company showed a huge gross loss on sales at PLN 199.9 million which stemmed from updating the costs and revenues estimates related to the two biggest projects:

- construction of a co-generation unit at a CHP plant in Vilnius; its effect on the Company's consolidated result amounted to PLN -105 million, and
- construction of a 910 MW power unit at the Jaworzno power plant; its effect on the Company's consolidated result amounted to PLN -89 million.

Cost of sales as disclosed in the P&L account in the amount of PLN 4.2 million includes expenses of offer preparations and PR & marketing costs.

2Q20 penalties and fines at PLN 2.7 million and compensations at PLN 0.1 million had the biggest impact on other operating revenues.

In 2Q20 the biggest impact on other operating costs came from impairment write-offs at PLN 22.7 million including:

- impairment write-offs on the remaining receivables with the advances granted at PLN 14.5 million,
- impairment write-offs on the trade receivables at PLN 3.8 million, and
- impairment write-offs on property, plant and equipment and intangibles, including the value of goodwill, at PLN 4.4 million.

Source: DM BOŚ SA estimates

Risk factors

1. Contractual penalties for a delay in Jaworzno and lack of the investor's participation in costs of a clearance of a breakdown.
2. Loss of liquidity – a payment of contractual penalties may result in insolvency.
3. Failure in new funding acquisition – KPMG Advisory was employed as an advisory to review possibilities of accessing new funding. When this fails, Rafako may turn up undercapitalized.
4. Failure to have the claims related to the composition proceedings satisfied (in part or in full amount) from PBG – due to the joint and several responsibility arising from cooperation in projects.
5. Debt capacity as related to banking and insurance sector.
6. Meagre contracting scale – material slowdown of new contracts acquisition may translate into inferior financial results and weaker financial condition of the Company.
7. More difficult access to insurance/banking guarantees – limiting the access to funding makes a new contracts acquisition more difficult. The lack of guarantees may translate into poorer ability to acquire contracts and to realize them.
8. Increasing competition – no more room for a construction of new coal-fueled power units in Poland may result in increasing competition in the remaining market segments such as: construction of environmental protection installations or oil&gas construction. The enhanced market competition may have an adverse impact on the profitability of newly acquired contracts.
9. Contractual penalties – contractual penalties, usually in the amount of 10% of the contract value, can undermine the Company's financial condition.
10. Materials price hikes – though curbed by the cost provisions created by the Company at the stage of the offer calculation this risk will burden the financial result in the case of a strong cost increase exceeding the level of provisions created.
11. Underestimated costs of projects execution.
12. Bankruptcy due to failure of composition proceedings and lack of liquidity arising from losses generated in FY19 and 1H20.

Catalysts

1. Acquisition of new funding – would improve the cash position.
2. Third-party claims enforceability – will allow the Company to maintain the profitability of contracts and stable financial position.
3. Avoiding contractual penalties in the Jaworzno project – will enable the Company to generate a 5% gross margin in this project.
4. Successful completion of the Jaworzno III power unit – will bring about the payment cash-in, favorable references, banking guarantees release.
5. The negative OCF trend reversal – should become a material catalyst for the Company's share price.
6. Backlog increase – new contracts acquisition will translate into a future business scale-up.
7. Launch of new technologies – vital competitive edge.
8. Access to new banking and insurance guarantees – better access to funding will enable Rafako to enter a bigger number of tenders and scale up its business.

BASIC DEFINITIONS

A/R turnover (in days) = $365/(\text{sales}/\text{average A/R})$
Inventory turnover (in days) = $365/(\text{COGS}/\text{average inventory})$
A/P turnover (in days) = $365/(\text{COGS}/\text{average A/P})$
Current ratio = $(\text{current assets} - \text{ST deferred assets})/\text{current liabilities}$
Quick ratio = $(\text{current assets} - \text{ST deferred assets} - \text{inventory})/\text{current liabilities}$
Interest coverage = $(\text{pre-tax profit before extraordinary items} + \text{interest payable})/\text{interest payable}$
Gross margin = $\text{gross profit on sales}/\text{sales}$
EBITDA margin = $\text{EBITDA}/\text{sales}$
EBIT margin = EBIT/sales
Pre-tax margin = $\text{pre-tax profit}/\text{sales}$
Net margin = $\text{net profit}/\text{sales}$
ROE = $\text{net profit}/\text{average equity}$
ROA = $(\text{net income} + \text{interest payable})/\text{average assets}$
EV = $\text{market capitalization} + \text{interest bearing debt} - \text{cash and equivalents}$
EPS = $\text{net profit}/\text{no. of shares outstanding}$
CE = $\text{net profit} + \text{depreciation}$
Dividend yield (gross) = $\text{pre-tax DPS}/\text{stock market price}$
Cash sales = $\text{accrual sales corrected for the change in A/R}$
Cash operating expenses = $\text{accrual operating expenses corrected for the changes in inventories and A/P, depreciation, cash taxes and changes in the deferred taxes}$

DM BOŠ S.A. generally values the covered non bank companies via two methods: comparative method and DCF method (discounted cash flows). The advantage of the former is the fact that it incorporates the current market assessment of the value of the company's peers. The weakness of the comparative method is the risk that the valuation benchmark may be mispriced. The advantage of the DCF method is its independence from the current market valuation of the comparable companies. The weakness of this method is its high sensitivity to undertaken assumptions, especially those related to the residual value calculation. Please note that we also resort to other valuation techniques (e.g. NAV-, DDM- or SOTP-based), should it prove appropriate in a given case.

KEY TO INVESTMENT RANKINGS

This is a guide to expected price performance in absolute terms over the next 12 months:

Buy – fundamentally undervalued (upside to 12M EFV in excess of the cost of equity) + catalysts which should close the valuation gap identified;
Hold – either (i) fairly priced, or (ii) fundamentally undervalued/overvalued but lacks catalysts which could close the valuation gap;
Sell – fundamentally overvalued (12M EFV < current share price + 1-year cost of equity) + catalysts which should close the valuation gap identified.

This is a guide to expected relative price performance:

Overweight – expected to perform better than the benchmark (WIG) over the next quarter in relative terms
Neutral – expected to perform in line with the benchmark (WIG) over the next quarter in relative terms
Underweight – expected to perform worse than the benchmark (WIG) over the next quarter in relative terms

The recommendation tracker presents the performance of DM BOŠ S.A.'s recommendations. A recommendation expires on the day it is altered or on the day 12 months after its issuance, whichever comes first.

Relative performance compares the rate of return on a given recommended stock in the period of the recommendation's validity (i.e. from the date of issuance to the date of alteration or – in case of maintained recommendations – from the date of issuance to the current date) in a relation to the rate of return on the benchmark in this time period. The WIG index constitutes the benchmark. For recommendations that expire by an alteration or are maintained, the ending values used to calculate their absolute and relative performance are: the stock closing price on the day the recommendation expires/ is maintained and the closing value of the benchmark on that date. For recommendations that expire via a passage of time, the ending values used to calculate their absolute and relative performance are: the average of the stock closing prices for the day the recommendation elapses and four directly preceding sessions and the average of the benchmark's closing values for the day the recommendation expires and four directly preceding sessions.

Distribution of DM BOŠ's current recommendations

	Buy	Hold	Sell	Suspended	Under revision

Banks

Net Interest Margin (NIM) = $\text{net interest income}/\text{average assets}$
Non interest income = $\text{fees\&commissions} + \text{result on financial operations (trading gains)} + \text{FX gains}$
Interest Spread = $(\text{interest income}/\text{average interest earning assets})/(\text{interest cost}/\text{average interest bearing liabilities})$
Cost/Income = $(\text{general costs} + \text{depreciation})/(\text{profit on banking activity} + \text{other net operating income})$
ROE = $\text{net profit}/\text{average equity}$
ROA = $\text{net income}/\text{average assets}$
Non performing loans (NPL) = loans in 'basket 3' category
NPL coverage ratio = $\text{loan loss provisions}/\text{NPL}$
Net provision charge = $\text{provisions created} - \text{provisions released}$

DM BOŠ S.A. generally values the covered banks via two methods: comparative method and fundamental target fair P/E and target fair P/BV multiples method. The advantage of the former is the fact that it incorporates the current market assessment of the value of the company's peers. The weakness of the comparative method is the risk that the valuation benchmark may be mispriced. The advantage of the fundamental target fair P/E and target fair P/BV multiples method is its independence of the current market valuation of the comparable companies. The weakness of this method is its high sensitivity to undertaken assumptions, especially those related to the residual value calculation. Assumptions used in valuation can change, influencing thereby the level of the valuation. Among the most important assumptions are: GDP growth, forecasted level of inflation, changes in interest rates and currency prices, employment level and change in wages, demand on the analysed company products, raw material prices, competition, standing of the main customers and suppliers, legislation changes, etc. Changes in the environment of the analysed company are monitored by analysts involved in the preparation of the recommendation, estimated, incorporated in valuation and published in the recommendation whenever needed.

This report has been prepared by Dom Maklerski Banku Ochrony Środowiska SA registered in Warsaw (hereinafter referred to as DM BOŚ SA) and commissioned by the Warsaw Stock Exchange SA (hereinafter referred to as WSE SA) pursuant to the agreement on the research report preparation between DM BOŚ SA and WSE SA within the framework of the Analytical Coverage Support Pilot Program described on the WSE SA website: <https://www.gpw.pl/gpwpa> (hereinafter referred to as the Agreement). DM BOŚ SA will receive a remuneration for the research report in accordance with the Agreement.

The production of the report was completed on October 13, 2020 at 7.35 a.m.

The report was distributed on October 13, 2020 at 7.45 a.m.

The report is an investment research within the meaning of Commission Delegated Regulation (EU) 2017/565 of 25 April 2016 supplementing Directive 2014/65/EU of the European Parliament and of the Council as regards organizational requirements and operating conditions for investment firms and defined terms for the purposes of that Directive. This report constitutes a recommendation within the meaning of Commission Delegated Regulation (EU) 2016/958 of 9 March 2016 supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest. This report is for information purposes only.

This report constitutes neither investment advice nor provides investment service as referred to in Article 76 of the Act on Financial Instruments Trading as of 29 July 2005 (Journal of Laws, 2018, Item 2286 as amended), hereinafter referred to as the Act on Trading; it does not constitute any legal or tax advice, neither does it constitute an indication whether an investment is suitable or appropriate in an individual situation of an investor. In particular this report is not a personal recommendation based on any individual needs or situation of any investor. DM BOŚ SA informs that the investment advice services exclusively consist in the preparation of a personal recommendation based on individual needs and situation of a given client and transferring it to them. To receive this type of a recommendation an agreement on providing investment advice services must be signed with an investments company offering these services.

Neither the information nor the opinions expressed in the report constitute a solicitation or an offer to buy or sell any securities referred herein. The opinions expressed in the report reflect independent, current judgment of DM BOŚ.

This report was prepared with due diligence and scrutiny. The information used in the report is based on all public sources such as press and branch publications, company's financial statements, current and periodic reports, as well as meetings and telephone conversations with company's representatives prior to the date of report's release. We believe the above mentioned sources of information to be reliable, however we do not guarantee their accuracy and completeness. All estimates and opinions included herein represent our judgment as of the date of the issue. All opinions, forecasts, calculations and estimates herein constitute the author's subjective assessment as of the date of the issue and can be modified at any time without prior notice. DM BOŚ SA informs that this report will be updated in the manner as referred to in the Agreement, at least once a year.

DM BOŚ SA is an investment firm within the meaning of the Act on Financial Instruments Trading. The legal entity supervising DM BOŚ SA is Polish Financial Supervision Authority in Warsaw (Komisja Nadzoru Finansowego, KNF in Polish abbreviation).

DM BOŚ SA, its management and supervisory bodies and employees do not take any responsibility for decisions taken on the basis of this report and opinions stated herein. Investors bear all responsibility for investment decisions taken on the basis of the contents of this report. The report is intended solely for private use of investors. Copyrights to this report belong to the WSE. The rules for use of this report have been specified in the Agreement. This report mustn't be redistributed, reproduced or conveyed in any manner or form conflicting with the rules defined in the Agreement.

This report is made available on the day of its issue in the public domain on the website <https://bossa.pl/analizy-i-informacje/wsparcie-pokrycia-analitycznego-gpw#rafako>

DM BOŚ SA is entitled to conveying or translation of the report into foreign languages on behalf of their clients and this shall not be sooner than making the report available on its website <https://bossa.pl/analizy-i-informacje/wsparcie-pokrycia-analitycznego-gpw#rafako>.

DM BOŚ SA follows internal regulations for handling of conflicts of interest which include in particular internal organizational and administration arrangements as well as information barriers established for prevention and avoidance of conflicts of interest related to recommendations. A special organizational arrangement that constitutes an information barrier is so called Chinese walls prohibiting an uncontrolled flow of information among particular organizational units or employees of DM BOŚ SA. Where justified, DM BOŚ SA can create Chinese walls upon the realization of a particular project. Potential conflicts of interests referring to a specific recommendation which is made available to the public or to a wide range of persons are disclosed either in the recommendation or in the document attached.

The person(s) preparing this report receive(s) variable compensation indirectly based upon the financial results of DM BOŚ which in turn depend – among other factors – on the result on the brokerage activity.

DM BOŚ SA has not held any long or short position net exceeding 0.5% of the issuer's basic capital in total with respect to the company/companies indicated.

Apart from the mentioned above cases, there are neither ties of any kind between DM BOŚ SA, the analyst/ analysts involved in the preparation of the report and the issuer(s) of securities as referred to in the report nor circumstances that can justifiably be expected to have a negative impact on objectivity of the recommendation with regard to interests or conflicts of interests on their part or on the part of any natural person or legal entity which pertains to the financial instrument or the issuer.

The report was not shown to the analyzed company before the distribution of the report.
