This is an excerpt from the Polish version of DM BOŚ SA's research report.

Votum

1Q24 financial results review

The segment of pursuing claims from abusive clauses showed results below expectations. 1Q24 revenues at PLN 77 million (down 10% yoy) were below our expectations which can be ascribed to several factors. The most important one is lower than we assumed revenues from the segment of pursuing claims in banking loan agreements where we expected a considerably higher success fee contribution in 1Q24. The banking segment's revenues amounted to PLN 60 million, down 5% yoy. The segment of pursuing claims for indemnity generated lower revenues than we expected; we assumed a sales contraction, but definitely smaller than the actual one. The rehabilitation segment's revenue were close to our expectations.

The profitability fell. 1Q24 EBITDA margin reached 27.9% vs 47.1% a year ago. The Group's EBITDA and EBIT at PLN 21.6 million and PLN 20.5 million, respectively, were considerably lower than we expected. The profitability drop is a derivative of both, the falling contribution of success fee in the sales mix and higher operating costs; for example HR costs grew as high as 49% yoy which is related to the Group's enhanced expansion translating into the need for more labor force. Finally, there is also a growth of salaries and a higher number of started court proceedings meaning heavier burden for the Company. We believe higher costs will prevail in the future given the offer broadening with pursuing claims from abusive in consumer loans that is important for the Company from the strategic perspective and generates most growth.

NI decline. The Group's 1Q24 net financial income reached PLN 4.3 million driven by a discount reversal. The effective tax rate at 18% was slightly below our expectations and ultimately, the Group's NI reached PLN 20.2 million and was below our forecast.

Recent events

1. Dividend policy for 2025-26 announced: April 23, 2024
2. Release of consolidated 1Q24 financial report: May 27, 2024

Upcoming events

1. General Shareholders Assembly: June 20
2. New type of agreements with CHF clients proposed by banks: possibly July-August
3. Release of consolidated 1H24 financial results: September 23
4. Release of 3Q24 consolidated results: November 25
5. Dividend day: September 18
6. 1st tranche of a dividend payment (DPS at PLN 1.21): October 16
7. 2nd tranche of a dividend payment (DPS at PLN 1.21): December 17
8. CJEU ruling regarding the C-113/23 matter on banks' claims for lending capital indexation: 2024

Financial forecasts

Following 1Q24 results release we modify our financial forecasts for the Company on the back of: (i) materially lower average success fee per client in the segment of pursuing claims from banks and (ii) much higher pace of 1Q24 costs growth than we assumed.

Revenues. Though we expected a sales contraction in the medium term, the first signs of a slow erosion of revenues are visible in 1Q24 results of the segment of pursuing claims from banks. This stems from two elements; on the one hand the acquisition of new clients with FX loans has slowed down which affects the entry fee level and even though this is not a deciding factor, its impact is likely to become stronger and stronger in the upcoming quarters due to adjustments of the pricing policy already announced as the Company would like to attract new clients and this implies an entry fee lowering. Another – more important – factor is falling success fee revenues which turned to be materially lower yoy, albeit here we expect an improvement in the upcoming quarters, however we still assume a lower than earlier level of this revenue component. We slightly lower our forecasts for the segment of pursuing claims for indemnity as its revenues remain under pressure (due to the impact of the Company exiting the business line of pursuing damages for vehicles).

Costs. A high growth of costs in 1Q24 stems partially from the Company's expansion into new regions which creates need for additional labor force and is mostly related to a development of products for pursuing claims from abusive clauses in consumer loans (free credit sanction). This project's scaling has been progressing with an impressive pace which implies a similarly high growth of operating costs and given rising minimum and average wages we expect visibly higher HR costs in the coming quarters.

A lower level of revenues (lower contribution of a success fee) coupled with higher than we expected fixed costs results in modified profitability forecasts; currently we assume a gradual decline of operating margins to start already this year and develop faster than we expected earlier. The introduced changes affect the NI forecasts for this year and onwards. We also update this year's dividend assumptions and assume (in line with the management's proposal) a DPS at PLN 2.42 (earlier we expected PLN 2.75).

Valuation

On the back of the financial forecasts update and the risk free rate increase, our 12M EFV – constituting a 80%-20% average of the outcomes of DCF and peer-relative valuation approaches – declines materially to PLN 49.4 per share (from PLN 66.9).

The DCF/ peer-relative valuation renders PLN 41.2 (prev. PLN 58.1) per share/ PLN 82.5 (prev. PLN 101.8) per share.

Recommended action

After the financial forecasts update our 12M EFV for Votum still delivers an upside, albeit due to a lack of important catalysts which may have helped to close the valuation gap we downgrade our LT fundamental recommendation to Hold (from Buy). This year the Group's profitability is likely to be materially lower yoy due to a higher growth of costs regarding the development of the project for pursuing claims from abusive clauses in consumer loans. The project has a good chance to be successful, which finally depends on the case law whether it will be favorable for clients or not and this is a time consuming process. At the same time 1Q24 financials showed some yoy erosion of the revenues from the banking segment stemming from slower client acquisition and lower success fee which implies a weaker revenue potential this year provided this trend prevails. A client acquisition is becoming more and more difficult and forces Votum to make its offer more attractive and lower prices, the more so that banks strive to improve the terms of agreements offered to the clients with FX-denominated loans given the growing awareness that at this stage a statutory solution is impossible to reach and the Ministry of Justice is carrying out works on a new format of agreements. At the same time, though we acknowledge the Company's considerable dividend potential in the medium term, we believe it is still too early for the Group to abruptly increase dividend payouts given a relatively low number of the contracts fully settled.

Taking into consideration weaker than we expected 1Q24 financial results and lack of meaningful catalysts in the nearest future we lower our ST relative rating for Votum to Neutral (from Overweight).

Risk factors

1. Rising willingness of clients to enter into agreements with banks
2. Smaller than assumed willingness of clients to choose the court path
3. Lower than expected demand for the Company's services
4. Unfavorable changes in the jurisprudence towards bank customers
5. Increasing competition
6. Clients' diminishing interest in the offer of pursuing abusive claims from PLN loan agreements
7. Shortage of workforce (rapid development requires an acquisition of qualified employees)
8. Change in the banks' court strategy and smaller number of appeals leading to lower revenues from KZP
9. Pressure on salaries
10. Delays of court sentences
11. Acquisitions of companies from the main shareholder and their high valuations
12. Lower payouts in pre-trial proceedings
13. Pressure on margins
14. Regulation of the compensation market (ideas proposed by some political parties before the parliamentary election)
15. Draft statutory regulation of the compensation institution
16. Departure of key managerial staff
17. Potential acquisitions of new companies
18. Disturbances in IT systems functioning (malfunction, cyber attacks)

Catalysts

1. Continuation of the pro-consumer trend in the jurisprudence of courts with regard to people with foreign currency loans
2. Favorable case law for pursuing of abusive clauses in consumer loan agreements
3. The continued growth of clients' interest in claims against banks, reinforced by favorable case law and by recommendations of satisfied clients after the winning sentence
4. Increasing dividend payments
5. Further depreciation of the PLNCHF exchange rate, increasing the borrowers' tendency to take legal action
6. Acceleration of court processing procedures
7. Improving acquisition of the banking segment's clients
8. Pursuing of abusive clauses in PLN loan agreements and cases based on the free credit sanction proving successful
9. Clients' low interest in agreements
10. Maintaining the leading position in the existing markets
11. Faster than assumed organic growth
12. New value-creating acquisitions for minority shareholders
13. LT success of new ventures

Competitive advantages

1. Main player on the most important product markets
2. Above-average efficiency compared to the competition coming from the scale effect
3. Automation and digitalization
4. Good historical track record
5. Motivated and competent management team holding equity position in the Company
6. A pioneer of the rapidly growing market of claims for foreign currency borrowers
7. Operational efficiency
8. Specialization in strictly defined product markets
9. Multi-channel distribution network

BASIC DEFINITIONS

A/R turnover (in days) = 365/(sales/average A/R))
Inventory turnover (in days) = 365/(COGS/average inventory))
A/P turnover (in days) = 365/(COGS/average A/P))
Current ratio = ((current assets – ST deferred assets)/current liabilities)
Quick ratio = ((current assets – ST deferred assets – inventory)/current liabilities)
Interest coverage = (pre-tax profit before extraordinary items + interest payable/interest payable)
Gross margin = gross profit on sales/sales
EBITDA margin = EBITDA/sales
EBIT margin = EBIT/sales
Pre-tax margin = pre-tax profit/sales
Net margin = net profit/sales
ROE = net profit/average equity
ROA = (net income + interest payable)/average assets
EV = market capitalization + interest bearing debt – cash and equivalents
EPS = net profit/ no. of shares outstanding
CE = net profit + depreciation
Dividend yield (gross) = pre-tax DPS/stock market price
Cash sales = accrual sales corrected for the change in A/R
Cash operating expenses = accrual operating expenses corrected for the changes in inventories and A/P, depreciation, cash taxes and changes in the deferred taxes

DM BOŚ S.A. generally values the covered non bank companies via two methods: comparative method and DCF method (discounted cash flows). The advantage of the former is the fact that it incorporates the current market assessment of the value of the company's peers. The weakness of the comparative method is the risk that the valuation benchmark may be mispriced. The advantage of the DCF method is its independence from the current market valuation of the comparable companies. The weakness of this method is its high sensitivity to undertaken assumptions, especially those related to the residual value calculation. Please note that we also resort to other valuation techniques (e.g. NAV-, DDM- or SOTP-based), should it prove appropriate in a given case.

KEY TO INVESTMENT RANKINGS

This is a guide to expected price performance in absolute terms over the next 12 months:

Buy – fundamentally undervalued (upside to 12M EFV in excess of the cost of equity) + catalysts which should close the valuation gap identified;
Hold – either (i) fairly priced, or (ii) fundamentally undervalued/overvalued but lacks catalysts which could close the valuation gap;
Sell – fundamentally overvalued (12M EFV < current share price + 1-year cost of equity) + catalysts which should close the valuation gap identified.

This is a guide to expected relative price performance:

Overweight – expected to perform better than the benchmark (WIG) over the next quarter in relative terms
Neutral – expected to perform in line with the benchmark (WIG) over the next quarter in relative terms
Underweight – expected to perform worse than the benchmark (WIG) over the next quarter in relative terms

The recommendation tracker presents the performance of DM BOŚ S.A.'s recommendations. A recommendation expires on the day it is altered or on the day 12 months after its issuance, whichever comes first.

Relative performance compares the rate of return on a given recommended stock in the period of the recommendation's validity (i.e. from the date of issuance to the date of alteration or – in case of maintained recommendations – from the date of issuance to the current date) in a relation to the rate of return on the benchmark in this time period. The WIG index constitutes the benchmark. For recommendations that expire by an alteration or are maintained, the ending values used to calculate their absolute and relative performance are: the stock closing price on the day the recommendation expires/ is maintained and the closing value of the benchmark on that date. For recommendations that expire via a passage of time, the ending values used to calculate their absolute and relative performance are: the average of the stock closing prices for the day the recommendation elapses and four directly preceding sessions and the average of the benchmark's closing values for the day the recommendation expires and four directly preceding sessions.

Distribution of DM BOŚ's current recommendations

	Buy	Hold	Sell	Suspended	Under revision	Not rated

Numbers	25	39	14	5	0	4
Percentage	29%	45%	16%	6%	0%	5%

Banks

Net Interest Margin (NIM) = net interest income/average assets
Non interest income = fees&commissions + result on financial operations (trading gains) + FX gains
Interest Spread = (interest income/average interest earning assets)/ (interest cost/average interest bearing liabilities)
Cost/Income = (general costs + depreciation)/ (profit on banking activity + other net operating income)
ROE = net profit/average equity
ROA = net income/average assets
Non performing loans (NPL) = loans in 'basket 3' category
NPL coverage ratio = loan loss provisions/NPL
Net provision charge = provisions created – provisions released

DM BOŚ S.A. generally values the covered banks via two methods: comparative method and fundamental target fair P/E and target fair P/BV multiples method. The advantage of the former is the fact that it incorporates the current market assessment of the value of the company's peers. The weakness of the comparative method is the risk that the valuation benchmark may be mispriced. The advantage of the fundamental target fair P/E and target fair P/BV multiples method is its independence of the current market valuation of the comparable companies. The weakness of this method is its high sensitivity to undertaken assumptions, especially those related to the residual value calculation. Assumptions used in valuation can change, influencing thereby the level of the valuation. Among the most important assumptions are: GDP growth, forecasted level of inflation, changes in interest rates and currency prices, employment level and change in wages, demand on the analysed company products, raw material prices, competition, standing of the main customers and suppliers, legislation changes, etc. Changes in the environment of the analysed company are monitored by analysts involved in the preparation of the recommendation, estimated, incorporated in valuation and published in the recommendation whenever needed.

This report has been prepared by Dom Maklerski Banku Ochrony Środowiska SA registered in Warsaw (hereinafter referred to as DM BOŚ SA) and commissioned by the Warsaw Stock Exchange SA (hereinafter referred to as WSE SA) pursuant to the agreement on the research report preparation between DM BOŚ SA and WSE SA within the framework of the Analytical Coverage Support Program 4.0 described on the WSE SA website: <https://www.gpw.pl/gpwpa> (hereinafter referred to as the Agreement). DM BOŚ SA will receive a remuneration for the research report in accordance with the Agreement.

The production of the report was completed on May 29, 2024 at 8.20 p.m.

The report was distributed on May 29, 2024 at 8.30 p.m.

The report is an investment research within the meaning of Commission Delegated Regulation (EU) 2017/565 of 25 April 2016 supplementing Directive 2014/65/EU of the European Parliament and of the Council as regards organizational requirements and operating conditions for investment firms and defined terms for the purposes of that Directive.

This report constitutes a recommendation within the meaning of Commission Delegated Regulation (EU) 2016/958 of 9 March 2016 supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest. This report is for information purposes only.

This report constitutes neither investment advice nor provides investment service as referred to in Article 76 of the Act on Financial Instruments Trading as of 29 July 2005 (Journal of Laws, 2018, Item 2286 as amended), hereinafter referred to as the Act on Trading; it does not constitute any legal or tax advice, neither does it constitute an indication whether an investment is suitable or appropriate in an individual situation of an investor. In particular this report is not a personal recommendation based on any individual needs or situation of any investor. DM BOŚ SA informs that the investment advice services exclusively consist in the preparation of a personal recommendation based on individual needs and situation of a given client and transferring it to them. To receive this type of a recommendation an agreement on providing investment advice services must be signed with an investments company offering these services.

Neither the information nor the opinions expressed in the report constitute a solicitation or an offer to buy or sell any securities referred herein. The opinions expressed in the report reflect independent, current judgment of DM BOŚ SA.

This report was prepared with due diligence and scrutiny. The information used in the report is based on all public sources such as press and branch publications, company's financial statements, current and periodic reports, as well as meetings and telephone conversations with company's representatives prior to the date of report's release. We believe the above mentioned sources of information to be reliable, however we do not guarantee their accuracy and completeness. All estimates and opinions included herein represent our judgment as of the date of the issue. All opinions, forecasts, calculations and estimates herein constitute the author's subjective assessment as of the date of the issue and can be modified at any time without prior notice. DM BOŚ SA informs that this report will be updated in the manner as referred to in the Agreement, at least once a year.

DM BOŚ SA is an investment firm within the meaning of the Act on Financial Instruments Trading. The legal entity supervising DM BOŚ SA is Polish Financial Supervision Authority in Warsaw (Komisja Nadzoru Finansowego, KNF in Polish abbreviation).

DM BOŚ SA, its management and supervisory bodies and employees do not take any responsibility for decisions taken on the basis of this report and opinions stated herein. Investors bear all responsibility for investment decisions taken on the basis of the contents of this report. The report is intended solely for private use of investors.

Copyrights to this report belong to the WSE. The rules for use of this report have been specified in the Agreement. This report mustn't be redistributed, reproduced or conveyed in any manner or form conflicting with the rules defined in the Agreement.

This report is made available on the day of its issue in the public domain on the website <https://bossa.pl/analizy/wsparcie-pokrycia-analitycznego-gpw#votum>

DM BOŚ SA is entitled to conveying or translation of the report into foreign languages on behalf of their clients and this shall not be sooner than making the report available on its website <https://bossa.pl/analizy/wsparcie-pokrycia-analitycznego-gpw#votum>

DM BOŚ SA follows internal regulations for handling of conflicts of interest which include in particular internal organizational and administration arrangements as well as information barriers established for prevention and avoidance of conflicts of interest related to recommendations. A special organizational arrangement that constitutes an information barrier is so called Chinese walls prohibiting an uncontrolled flow of information among particular organizational units or employees of DM BOŚ SA. Where justified, DM BOŚ SA can create Chinese walls upon the realization of a particular project. Potential conflicts of interests referring to a specific recommendation which is made available to the public or to a wide range of persons are disclosed either in the recommendation or in the document attached.

The person(s) preparing this report receive(s) variable compensation indirectly based upon the financial results of DM BOŚ SA which in turn depend – among other factors – on the result on the brokerage activity.

DM BOŚ SA has not held any long or short position net exceeding 0.5% of the issuer's basic capital in total with respect to the company/companies indicated.

Apart from the mentioned above cases, there are neither ties of any kind between DM BOŚ SA, the analyst/ analysts involved in the preparation of the report and the issuer(s) of securities as referred to in the report nor circumstances that can justifiably be expected to have a negative impact on objectivity of the recommendation with regard to interests or conflicts of interests on their part or on the part of any natural person or legal entity which pertains to the financial instrument or the issuer.

The report was not shown to the analyzed company before the distribution of the report.

The history of all recommendations issued by DM BOŚ in the last 12 months can be found at the following link: <https://bossa.pl/analizy/rekomendacje>
