

**Key investor information**

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**Xtrackers S&P 500 2x Inverse Daily Swap UCITS ETF**

**Share class: 1C, ISIN: LU0411078636, Security code: DBX0B6, Currency: USD**

a sub-fund of Xtrackers. The management company is DWS Investment S.A., a member of the DWS Group.

**Objectives and investment policy**

The fund is passively managed. The aim is for your investment to reflect the performance of the S&P 500 2x Inverse Daily Index (index) which provides two times the opposite performance of the S&P 500 Index (Underlying Index) on a daily basis plus a rate of interest. This means that the level of the index should rise at double the rate the Underlying Index falls and fall at double the rate the Underlying Index rises. The interest rate added to the index level is based on three times the rate at which banks in London lend US dollars to each other overnight. The Underlying Index is designed to reflect the performance of shares of 500 companies representing all

major US industries and comprises shares of large companies traded on certain eligible US exchanges. A company's weighting in the Underlying Index depends on its relative size based on the combined value of a company's readily available shares compared to other companies on the stock markets. To achieve the aim, the fund will enter into financial contracts (derivatives) with one or more swap counterparties to swap most subscription proceeds for the return on the index. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

**Risk and reward profile**

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 7 because its share price may fluctuate very strongly and the likelihood of both losses and gains may therefore be very high. The following risks could be of particular significance for the fund: The fund does not invest directly in the components of the index and its returns will be dependent on the performance of the derivatives used. The fund may enter into one or more derivatives with one or more counterparties. If any of the counterparties fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss. DWS entities and related

companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The index is constructed to track the performance of an increased (leveraged) negative (known as short) exposure to the Underlying index, meaning that the level of the index should rise when the Underlying index falls and fall when the Underlying index rises. The index is designed to do this on a daily basis only which should not be equated with seeking a short position for periods longer than a day. The performance of the fund over periods longer than one day may not be inversely proportional or symmetrical with the returns of the Underlying index. The fund is intended for investors who wish to take a very short term view on the Underlying index and whose investments are not intended as buy and hold investments. The derivative used to gain exposure to the index may be adjusted to reflect certain expenses in relation to taxes and/or buying, selling, borrowing, financing or custody costs. These replication costs may result in the fund and your investment suffering a loss.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

**Charges**

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

<b>One-off charges taken before or after you invest</b>	
<b>Entry charge</b>	None
<b>Exit charge</b>	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
<b>Charges taken from the fund over a year</b>	
<b>Ongoing charges</b>	0.70 %
Charges taken from the fund under certain specific conditions	
<b>Performance fee</b>	None

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure is based on expenses for the fiscal year ending 31.12.2019. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

## Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the 1C share class of Xtrackers S&P 500 2x Inverse Daily Swap UCITS ETF were deducted during the calculation. The 1C share class of Xtrackers S&P 500 2x Inverse Daily Swap UCITS ETF was launched in 2010.

## Practical information
