## VanEck Vectors™ J.P. Morgan EM Local Currency Bond UCITS ETF (the "Fund")

a sub-fund of VanEck Vectors™ UCITS ETFs plc (the "Company")

ISIN: IE00BDS67326

This Fund is managed by VanEck Investments Ltd, a subsidiary of Van Eck Associates Corporation.

## Objectives and Investment Policy

The Fund's investment objective is to replicate, before fees and expenses, the price and yield performance of the J.P. Morgan GBI-EMG Core Index (the "Index").

The Fund will seek to achieve its objective by investing in a diversified portfolio of bonds issued by emerging market governments that, as far possible and practicable, consist of the component securities that comprise the Index. The Index is comprised of fixed rate domestic currency government bonds with greater than 13 months to maturity issued by emerging market governments and denominated in the local currency of the issuer.

The Fund does not purchase all of the securities in the Index. Instead, the Investment Manager utilizes a "sampling" methodology in seeking to achieve the Fund's objective. As such, the Fund may purchase a subset of the bonds in the Index in an effort to hold a portfolio of bonds with generally the same risk and return characteristics of the Index. The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Index concentrates in an industry or group of industries.

The Fund may invest in ancillary liquid assets and money market instruments which may include bank deposits, certificates of deposit, fixed or floating rate instruments, commercial paper, floating rate notes and freely transferable promissory notes.

The Fund may also invest in financial derivative instruments (FDIs) for efficient

portfolio management or hedging purposes. The Fund may use futures, swaps and currency forwards for the purpose of reducing risk associated with currency exposures within the Fund. This may on occasions lead to an increase in risk profile of the Fund or result in a fluctuation in the expected level of volatility. The investment in FDIs is subject to the conditions and limits contained in the Central Bank UCITS Regulations issued by the Central Bank of Ireland.

The Fund invests in the underlying (physical) securities that make up the Index and does not take part in securities lending.

The Fund, using a "passive" or indexing investment approach, attempts to approximate the investment performance of the Index by investing in a portfolio of securities that generally replicates the Index. The Investment Manager will regularly monitor the Fund's tracking accuracy.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

## Risk and Reward Profile

The risk and reward indicator is calculated using historical and simulated historical data. Historical data may not be a reliable indication for the future. Therefore, the risk classification may change over time.

Even if the Fund is in the lowest risk category, it does not mean it is risk free or that capital is guaranteed or protected.

This Fund is ranked at 4 because funds of this type have experienced high rises and falls in value in the past.

Investments in emerging market countries are subject to specific risks and securities are generally less liquid and less efficient and securities markets may be less well regulated.

The following risks can be materially relevant but are not necessarily adequately captured by the synthetic risk indicator and may cause additional loss:

- Bonds and bond funds decrease in value as interest rates rise. Investing in foreign denominated and/or domiciled securities may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. As the Fund may invest in securities denominated in foreign currencies and some of the income received will be in foreign currencies, changes in currency exchange rates may negatively impact the Fund's return.
- The Fund may also be subject to credit risk, interest rate risk, sovereign debt risk, tax risk, non-diversification risk and risks associated with non-investment grade securities. Non-investment grade securities may be subject to greater market fluctuations and risk of default or loss of income and principal than securities in higher rating categories.

For more information on risks, please see the "Risk Factors" section of the Fund's prospectus, available on [www.vaneck.com](http://www.vaneck.com).
