WisdomTree Enhanced Commodity UCITS ETF-USD Acc

ISIN: IE00BYMLZY74

a share class of WisdomTree Enhanced Commodity UCITS ETF (the “Fund”)

which is a sub-fund of WisdomTree Issuer ICAV. Managed by WisdomTree Management Limited.

Objectives and Investment Policy

- The Fund seeks to track the price and yield performance, before fees and expenses of the Optimised Roll Commodity Total Return Index (the “Index”).
- The Index is a US Dollar denominated index whose main objective is to provide a broad and diversified UCITS compliant commodity exposure, tracking the performance of a basket of commodities indices covering Energy, Agriculture, Industrial Metals and Precious Metals. The Index is rebalanced on a yearly basis. The Index generates exposure to each commodity through investment in the relevant S&P GSCI® Dynamic Roll Indices, the S&P GSCI® Gold and Silver indices as well as the Bloomberg® Soybean Oil and Soybean Meal Indices (each an “Index Component”).
- The Fund may have an indirect exposure to an Index Component of up to 20% of its Net Asset Value. This limit may be raised to 35% for a single issuer when exceptional market conditions apply (such as the dominance of a particular Index Component).
- The Fund will gain indirect exposure to the Index Components through the use of swaps. By entering into swap agreements with one or more banks whereby the Fund receives payments from the bank when the Index goes up and the Fund makes payments to the bank when the Index goes down. By using swaps, the Fund can efficiently track the upward or downward performance of the Index. The Fund pays certain fees and expenses to the bank(s) for entering into the swaps. The use of swaps results in the management of cash and collateral by the Fund’s investment manager.
- The Fund may enter into repurchase/reverse repurchase agreements and stock lending arrangements solely for the purposes of efficient portfolio management, subject to the conditions and within the limits set out in the prospectus for WisdomTree Issuer ICAV (the “Prospectus”).
- Shares of the Fund (“Shares”) are listed on one or more stock exchanges. Typically, only Authorised Participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.
- Distribution policy: Dividends will not be distributed to shareholders in respect of the shares of this class. Income and other profits will be accumulated and reinvested on behalf of the shareholders.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Currency: The base currency of the Fund is US Dollar. The currency of denomination of this share class is US Dollar.
- For full investment objectives and policy details, please refer to the supplement to the Prospectus for the Fund (the “Supplement”).

Risk and Reward Profile

- The categorisation above is not guaranteed to remain unchanged and may shift over time.
- The lowest category (1) does not imply a risk-free investment.
- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The categorisation above (5) is due to the nature of the Fund’s investments and risk associated with those investments, including:
 - Commodity Risks: Commodity prices are more volatile than other asset categories, making investments in commodities riskier and more complex than other investments.
 - The performance of a commodity and the corresponding commodity contract is dependent upon various factors, including supply and demand, liquidity, weather conditions and natural disasters, direct investment costs, location, changes in tax rates and roll return risk.
 - There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
 - Investment risk may be concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
- FDI Risks: include (i) failure to predict accurately the direction of the market movements and (ii) market risks of lack of liquidity or lack of correlation between the change in the value of the underlying asset and the value of the Fund’s derivatives.
- Risks not covered by the indicator, but which are materially relevant to the Fund include:
 - Tracking error risk: The Fund’s performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund’s portfolio and other Fund expenses.
 - There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund.
 - It may be difficult for the Fund to buy or sell certain investments in some market conditions. Consequently, the price obtained when the Fund buys or sells securities may compare adversely to the price under normal market conditions.
 - Counterparty risk: The Fund is subject to the risk that third parties with which the Fund may transact may go bankrupt or fail to pay money due to the Fund or return property belonging to the Fund.
- For a complete overview of all risks attached to this Fund, refer to the section entitled “Risk Factors” in the Supplement and the Prospectus
