

**Key investor information**

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**Xtrackers CSI300 Swap UCITS ETF**

**Share class: 1C, ISIN: LU0779800910, Security code: DBX0M2, Currency: USD**

a sub-fund of Xtrackers. The management company is DWS Investment S.A., a member of the DWS Group.

**Objectives and investment policy**

The fund is passively managed. The aim is for your investment to reflect the performance of the CSI300 Index (index) which reflects the performance of shares of 300 companies listed on the Shanghai Stock Exchange and the Shenzhen Stock Exchange (China A Shares). The index is calculated in Renminbi (CNY). The shares are issued by companies which are selected on the basis that they have the largest combined value of readily available shares as compared to other companies on the stock exchanges. The index is reviewed and may be adjusted every 6 months. The index is

calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. To achieve the aim, the fund will invest in transferable securities and enter into financial contracts (derivatives) with one or more swap counterparties relating to the transferable securities and the index, in order to obtain the return on the index. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

**Risk and reward profile**

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund does not invest directly in the components of the index and its returns will be dependent on the performance of the derivatives used. The fund may enter into one or more derivatives with one or more counterparties. If any of the counterparties fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss. DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts

of interest. The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks (including market suspension risks) than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment. Your investment is dependent on the performance of the index less costs but your investment is not expected to match that performance precisely. The derivative counterparty may reduce the payments under the swap agreement if the tax policies in China change. The reduction may result in a negative impact on the net asset value of the shares. The index is rules-based and is not capable of being adjusted to take into account changing market circumstances. As a result you may be negatively affected by, or may not benefit from, the lack of such adjustments in changing market circumstances. The derivative used to gain exposure to the index may be adjusted to reflect certain expenses in relation to taxes and/or buying, selling, borrowing, financing or custody costs. These replication costs may result in the fund and your investment suffering a loss.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

**Charges**

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
<b>Entry charge</b>	None
<b>Exit charge</b>	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
<b>Ongoing charges</b>	0.50 %
Charges taken from the fund under certain specific conditions	
<b>Performance fee</b>	None

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure is based on expenses for the fiscal year ending 31.12.2019. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

## Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the 1C share class of Xtrackers CSI300 Swap UCITS ETF were deducted during the calculation. The 1C share class of Xtrackers CSI300 Swap UCITS ETF was launched in 2012.

— During the course of 2017 the fund changed from tracking the "price return" version of the index to tracking the "total return" version of the index. As a result performance shown until 2017 was achieved under circumstances that no longer apply. 2017 shows a combined performance of both indices.
