Vanguard FTSE Emerging Markets UCITS ETF (the "Fund")

A sub-fund of Vanguard Funds PLC

(USD) Distributing
ISIN: IE00B3VVM84

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach, through physical acquisition of securities, and seeks to track the performance of the FTSE Emerging Index (the "Index").
- The Index is comprised of large and mid-sized company stocks in emerging markets.
- The Fund attempts to:
 - Track the performance of the Index by investing in a representative sample of Index constituent securities.
 - Remain fully invested except in extraordinary market, political or similar conditions.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The base currency of the Fund is USD.
- The Fund invests in securities which are denominated in currencies other than the listing currency. Movements in currency exchange rates can affect the return of investments.
- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The Fund may not be appropriate for short-term investment.
- Income from the ETF Shares will normally be paid out quarterly.
- ETF Shares are listed on one or more stock exchange(s). Subject to certain exceptions set out in the Prospectus, investors who are not Authorised Participants may only sell ETF Shares through a company

that is a member of a relevant stock exchange at any time when that stock exchange is open for business.

- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus) by submitting an application in writing or by telephone. A full list of the days on which shares in the Fund cannot be sold is available on <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11628>

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

of the Prospectus on our website at <https://global.vanguard.com>

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 6 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily which could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.

For further information on risks please see the "Risk Factors" section
