

**Key investor information**

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**Xtrackers MSCI World Value UCITS ETF**

**Share class: 1C, ISIN: IE00BL25JM42, Security code: A1103E, Currency: USD**

a sub-fund of Xtrackers (IE) plc. The management company is DWS Investment S.A., a member of the DWS Group.

**Objectives and investment policy**

The fund is passively managed. The fund aims to reflect the performance, before fees and expenses, of the MSCI World Enhanced Value (USD) Index (index). The index is based on the MSCI World Index (Parent Index) which is designed to reflect the performance of certain shares in large and medium listed companies in developed markets countries. In order to be eligible for inclusion in the index, shares must be included as constituents within the Parent Index and are then selected using a value strategy. The value strategy considers various value characteristics of the shares and compares those results to peer companies. The characteristics focus on Price-to-Book-Value (price of shares relative to their book value), Price-to-Forward Earnings (price of shares relative to their expected future earnings), and Enterprise Value-to-Cash Flow from Operations (which measures the value of the company relative to the cash it generates). The index is calculated on a total return net basis which means that all dividends

and distributions by the companies are reinvested in the shares after tax. The index is rebalanced on a semi-annual basis and may also be rebalanced at other times to reflect corporate activity such as mergers and acquisitions. The index is calculated daily in US Dollars. To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying all or a substantial number of the securities in the index. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). The fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the fund. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

**Risk and reward profile**

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. DWS entities and related companies may act in several roles in relation to the fund such as distributor

and management company which may involve conflicts of interest. The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The index is rules-based and is not capable of being adjusted to take into account changing market circumstances. As a result you may be negatively affected by, or may not benefit from, the lack of such adjustments in changing market circumstances. The fund is designed for knowledgeable and experienced investors who are able to understand and evaluate the fund's value-based investment strategy and inherent risks and, in particular, are able to assess how the index is expected to perform in a range of market cycles. Due to the "value" focus of the index, investors need to understand when market conditions would favour a value-driven approach or when investing in other strategies may be more appropriate. Due to the "value" focus of the index, the performance and constituents of the index, and hence the fund, may differ significantly from that of the MSCI World index. The fund may use derivatives to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

**Charges**

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
<b>Entry charge</b>	None
<b>Exit charge</b>	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
<b>Ongoing charges</b>	0.25 %
Charges taken from the fund under certain specific conditions	
<b>Performance fee</b>	None
<b>Securities lending fees</b>	0.01 %

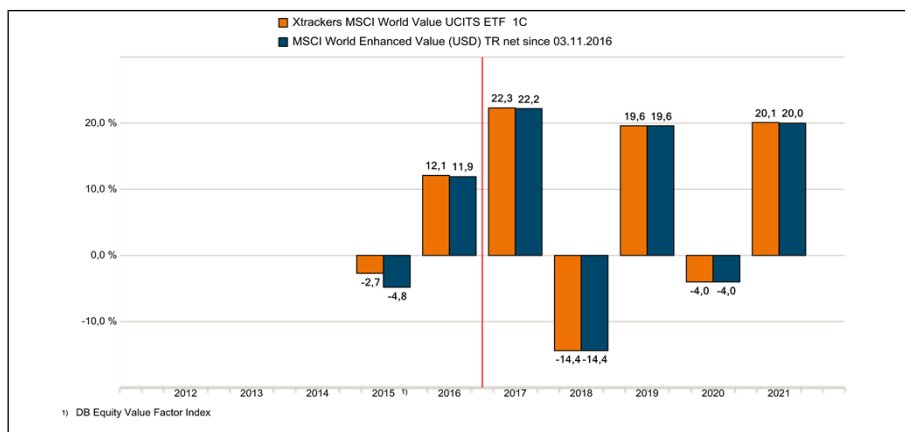

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure is based on expenses for the fiscal year ending 31.12.2021. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

To the extent the fund undertakes securities lending to generate revenue, the fund will ultimately be allocated 70% of the associated revenue, the securities lending agent, which will be a DWS entity or other Deutsche Bank entity, will be allocated 15% and the remaining 15% will be allocated to the DWS entity which monitors such activities, as set out in the prospectus. As securities lending revenue sharing does not increase the costs of running the fund, this has been excluded from the ongoing charges.

## Past performance

As of 3 November 2016 the fund changed its investment objective to reflect the performance of the index. The past performance shown up to 2015 (inclusive), is that of the DB Equity Value Factor Index. 2016 shows a combined performance of both indices.

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the 1C share class of Xtrackers MSCI World Value UCITS ETF were deducted during the calculation. The 1C share class of Xtrackers MSCI World Value UCITS ETF was launched in 2014.

## Practical information

The depositary is State Street Custodial Services (Ireland) Limited, Ireland. Copies of the prospectus and the periodic reports are available free of charge in the language of this document. The documents as well as other information (including the latest share prices as well as the indicative net asset values) are available free of charge. The documents are available on your local DWS website or at [www.Xtrackers.com](http://www.Xtrackers.com), for full disclosure on the composition of the fund's portfolio and information on the index constituents please refer to this website as well.
