The Commission de Surveillance du Secteur Financier (CSSF) is responsible for supervising the manufacturer, JPMorgan Asset Management (Europe) S.à.r.l., (a member of JPMorgan Chase & Co.) in relation to this Key Information Document.

The Sub-Fund is authorised in Ireland and regulated by the Central Bank of Ireland ("CBI").

THIS DOCUMENT WAS PRODUCED ON 1 JANUARY 2023

What is this product?

Type

This product is a UCITS exchange traded fund or "UCITS ETF". It is a sub-fund of JPMorgan ETFs (Ireland) ICAV, an Irish collective asset-management vehicle constituted as an umbrella fund with segregated liability between its sub-funds and authorised by the CBI pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

Objectives, Process and Policies

Objective The Sub-Fund seeks to provide returns that correspond to those of its Index.

Share Class Benchmark JP Morgan Diversified Factor Global Developed (Region Aware) Equity Index

Investment Policy The Sub-Fund pursues a passively managed (indextracking) strategy.

The Sub-Fund aims to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

The Index is comprised of large and mid-capitalisation equity securities issued in developed markets globally, is published by FTSE Russell and rebalances quarterly (as referred to under the "Index Tracking Risk" in the Prospectus). Further details on the Index, including its components and performance, are available at <https://www.ftse.com/products/indices/jpmorgan-factor>.

The Index is designed to capture the performance of stocks which display certain factor characteristics more strongly when compared to their peer group (i.e. other stocks in the same sector or region). Factors are characteristics that describe the risk and return profile of securities from which investors expect to achieve above average returns over time, through assuming a particular risk or taking advantage of a behavioural bias.

The Index allocates regional weights according to the FTSE Developed Index and then uses a two-step rules-based approach that weights sectors equally based on volatility followed by a stock selection process that uses multiple factors referred to as "multi-factor". This process involves investing in stocks in the FTSE Developed Index according to an overall multi-factor score derived from equally weighting the three factors described below:

- **Value.** The tendency of stocks trading at a lower price relative to their fundamental characteristics (such as their price-to-earnings or price-to-book ratios) to generate more attractive returns over the long term.
- **Momentum.** The tendency of stocks which have exhibited higher returns relative to their volatility to continue to exhibit more attractive returns.
- **Quality.** The tendency of stocks of financially stable companies (based on measures of their solvency, their profitability, and the quality of their earnings) to generate more attractive returns relative to their volatility over the long term.

The Sub-Fund may, for efficient portfolio management purposes, use financial derivative instruments.

USD is the base currency of the Sub-Fund.

It is currently anticipated that the tracking error of the Sub-Fund will be up to 100 bps under normal market conditions. The causes of

tracking error can include but are not limited to the following: holdings/size of the Sub-Fund, cash flows, such as any delays in investing subscription proceeds into the Sub-Fund or realising investments to meet redemptions, fees and the frequency of rebalancing against the Index.

The Sub-Fund will publicly disclose its complete holdings on a daily basis. Details of the Sub-Fund's holdings and full disclosure policy may be found on www.jpmorganassetmanagement.lu.

Redemption and Dealing Shares of the Sub-Fund are traded on one or more stock exchanges. Certain market makers and brokers may subscribe and redeem Shares directly with JPMorgan ETFs (Ireland) ICAV, and are referred to as "Authorised Participants". Other investors who are not Authorised Participants can purchase and sell Shares daily on a recognised stock exchange or over-the-counter.

Distribution Policy This Share Class does not pay dividends. Earned income is retained in the Net Asset Value.

What are the risks and what could I get in return?

Risks

The risk indicator assumes you keep the product for 5 year(s).

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. The risk of the product may be significantly higher if held for less than the recommended holding period.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Beside the risks included in the risk indicator, other risks materially relevant for the product may affect its performance. Please refer to the relevant supplement, available free of charge at www.jpmorganassetmanagement.lu.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 2021 and 2022.

Moderate: this type of scenario occurred for an investment between 2015 and 2020.

Favourable: this type of scenario occurred for an investment between 2013 and 2018.

What happens if JPMorgan Asset Management (Europe) S.à.r.l. is unable to pay out?

JPMorgan Asset Management (Europe) S.à.r.l. is responsible for administration and management of the Sub-Fund and does not hold assets of the Sub-Fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). JPMorgan Asset Management (Europe) S.à.r.l., as

the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Sub-Fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any of, your loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- \$ 10,000 is invested.

Example Investment \$ 10,000	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	\$ 24	\$ 169
Annual cost impact*	0.2%	0.2%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.8% before costs and 8.8% after costs.
