What is this Product?

| | |
|----------------------------------|---|
| Type: | The Product is a UCITS sub-fund of the Manufacturer, an umbrella fund structure comprising different sub-funds. The Product is authorized in The Netherlands and regulated by the Authority for the Financial Markets (AFM). Under Dutch law, the Manufacturer has segregated liability between its sub-funds. While the Key Information Document is drafted on the level of each sub-fund, Prospectus and Financial Reports are drawn up on the level of the Manufacturer. The Management Company does currently not offer an exchange of shares for shares of another sub-fund. |
| Term: | No fixed term. We are entitled to terminate the management of the Product by giving at least one month notice to investors as published at least on our website. |
| Objective: | <p>The VanEck Morningstar Developed Markets Dividend Leaders UCITS ETF is an exchange traded fund (ETF) which seeks to follow the Morningstar® Developed Markets Large Cap Dividend Leaders Index™ (gross total return index) as closely as possible. The reference index measures the performance of high-dividend shares in developed countries worldwide. It currently consists of 18 markets, specifically: Australia, Canada, Denmark, Germany, Finland, France, Hong Kong, Italy, Japan, Norway, Austria, Portugal, Singapore, Spain, the United Kingdom, the United States, Sweden and Switzerland.</p> <p>The Product is passively managed and invests in the underlying (physical) securities that make up the index and does not lend the underlying securities out to third parties.</p> <p>The Manager has categorised the Product as meeting the provisions set out in Article 8 of Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector ("SFDR") for products, which promote environmental and/or social characteristics and invest in companies that follow good governance practices. The Product does not have sustainable investment as its investment objective.</p> <p>The Morningstar® Developed Markets Large Cap Dividend Leaders Index™ consists of 100 shares from a worldwide universe that satisfy criteria in relation to dividend policy, size and liquidity. The index uses a weighting method based on the total available dividend. The total available dividend per share is calculated by multiplying the number of freely tradable shares by the dividend per share.</p> <p>Income from the Product's investments is paid out as dividend. There is the possibility of dividend 4 times per year, but the height of the dividend to be paid out must also be considered. It may be the case that the income from the dividend is relatively low in a particular quarter, which means that from a cost perspective, it makes more sense to keep the income in the Product until the next payment opportunity.</p> <p>Dealing Frequency: You may purchase and redeem shares in this Product on a daily basis and in accordance with the relevant notice period.</p> <ul style="list-style-type: none"> • Product's base currency: Euro • Distribution policy: Income distributed |
| Intended Retail Investor: | This Product is intended for all kinds of investors who are looking for capital growth and/or optimization and have an investment horizon which is at least equal to the recommended holding period shown below. Only those investors who have the ability to make an informed decision based on sufficient knowledge and understanding of the Product and the market and the ability to bear a loss up to a total loss of their investment should consider investing in the Product. The Product does not offer a capital guarantee. |

What are the risks and what could I get in return?

The risk indicator assumes you keep the Product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Product compared to other Products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you. We have classified this Product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium and poor market conditions could to impact the capacity of VanEck ETFs N.V. to pay you. **Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies.** This Product does not include any protection from future market performance so you could lose some or all of your investment. The following risk may be materially relevant to the Product but may not be adequately captured by the summary risk indicator and may cause additional loss: Foreign Currency Risk as further described in the Prospectus.

Performance scenarios and the assumptions made to produce them:

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product over the last 10 years. Markets could develop very differently in the future.

| Recommended holding period: 5 years. | | | |
|--------------------------------------|---|--------------------------|---------------------------|
| Example Investment: EUR 10,000 | | | |
| Scenarios | | If you exit after 1 year | If you exit after 5 years |
| Minimum | <i>There is no minimum guaranteed return. You could lose some or all of your investment.</i> | | |
| Stress | <i>What you might get back after costs</i> | EUR 2,910 | EUR 3,370 |
| | Average return each year | -70.93 % | -19.55 % |
| Unfavourable | <i>What you might get back after costs</i> | EUR 7,040 | EUR 7,800 |
| | Average return each year | -29.65 % | -4.85 % |

| | Average return each year | 50.36 % | 12.02 % |

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. Where applicable for the unfavourable, moderate and favourable scenarios: The unfavourable scenario occurred for an investment between March 2015 and March 2020. The moderate scenario occurred for an investment between September 2014 and September 2019. The favourable scenario occurred for an investment between October 2012 and October 2017. Your maximum loss would be that you will lose all your investment.

What happens if VanEck ETFs N.V. is unable to pay out?

The failure of the Manufacturer has no direct effect on your payout, as the statutory regulation provides that in the event of the insolvency of the Manufacturer, the Product does not become part of the insolvency estate but is maintained in its own right. Fund investments do not fall within the scope of any guarantee or compensation scheme.

What are the costs?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.
- EUR 10 000 is invested

| Cost over time | | |
|-------------------------------|--------------------------|---------------------------|
| | If you exit after 1 year | If you exit after 5 years |
| Total costs | EUR 45 | EUR 222 |
| Annual cost impact (*) | 0.4 % | 0.4 % |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.7 % before costs and 6.3 % after costs. We may share part of the costs with the person selling you the Product to cover the services they provide to you. They will inform you of the amount.

| Composition of Costs | | |
