This document was produced on 1 January 2023.

What is this product?

Type:

This product is a UCITS fund.

Term:

This is an Open Ended Fund.

Objectives:

The Fund's investment objective is to generate returns that closely correspond, before fees and expenses, generally to the price and yield performance of the Solactive Global Lithium v2 Index (the "Index"). The Fund is passively managed. The Fund will aim to achieve its investment objective by attempting to replicate the performance of the Index by investing primarily in a portfolio of equity securities that as far as possible and practicable consists of the component securities of the Index in similar proportions to their weightings in the Index and in American depositary receipts ("ADRs") and global depositary receipts ("GDRs") based on the securities in the Index.

The Index aims to measure broad-based equity market performance of global companies involved in the lithium industry. The Index tracks the performance of the largest and most liquid listed companies that are active in the exploration and/or mining of Lithium or the production of Lithium batteries.

When not possible or practicable to continue to hold all of the component securities of the Index, the Fund may invest in depositary receipts relating either to components securities of the Index or to equity securities of the type referred to above; and financial derivative instruments ("FDIs"), namely, total return "unfunded" OTC swaps and exchange-traded equity

futures for investment purposes.

The Fund may enter into securities lending transactions, investing in repurchase and reverse repurchase transactions and short term money market collective investment schemes, for the purposes of efficient portfolio management only.

The Fund's base currency is USD.

For Accumulating Shares, income will be automatically reinvested in the Fund and reflected in the NAV per share.

Investors can buy and sell shares of the Fund on each business day. Business day means a day on which the New York Stock Exchange is open for normal business.

For more information about the investment policy and strategy of the Fund, please refer to the sections entitled "Investment Objective" and "Investment Policy" in the Fund's supplement.

Intended retail investor:

This Fund is intended for investors who want to take a long or short-term exposure to the market covered by the index of the Fund and would be prepared to take on a medium level of risk associated with an investment of this type, including potential volatility of such market. Such an investor must also be one that is able to assess the merits and risks of an investment in the Shares of the relevant Class of the Fund.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the ability for you to receive a positive return on your investment.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the product's Annual Report or Prospectus available at www.globalxetfs.eu.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor / and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of Global X Lithium & Battery Tech UCITS ETF over the last 10 years.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended Holding Period: 5 years			
Investment: USD 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Minimum: There is no minimum guaranteed return if you exit before 5 years			
Stress	What you might get back after costs Average return each year	910 USD -90.93%	850 USD -38.89%
Unfavourable¹	What you might get back after costs Average return each year	8,230 USD -17.73%	8,740 USD -2.67%
Moderate²	What you might get back after costs Average return each year	11,950 USD 19.50%	21,330 USD 16.36%
Favourable³	What you might get back after costs Average return each year	17,200 USD 72.04%	29,950 USD 24.53%

¹ This type of scenario occurred for an investment between July 2016 and July 2022.

² This type of scenario occurred for an investment between September 2013 and September 2018.

³ This type of scenario occurred for an investment between June 2016 and June 2021.

What happens if Global X Management Company LLC is unable to pay out?

You may face a financial loss should the manufacturer or depository/custodian, SEI Investments – Depository and Custodial Services (Ireland) Limited, default on their obligations.

There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario and the investment is USD 10,000.

Investment Scenarios (\$10,000)	If you exit after 1 year	If you exit after 5 years
Total costs	86 USD	839 USD
Annual cost impact (*)	0.9%	0.9%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 17.3% before costs and 16.4% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
